

Off-Grid Solar Powered Broadband

"Faster than the bush telegraph"

Off-Grid Broadband

Bush Broadband is pushing fast internet connections further than some companies by using small radios which can transmit broadband signals over several kilometres.

We provide a solar powered internet solution for people living off grid, for mobile homes and RVs, for remote homes and work stations.

Off-Grid Solar Powered Broadband Kit £425 plus delivery & VAT

- o 100W Solar Panel
- o Broadband Receiver
- o Intelligent Charge Controller
- o 75 AmpHour Deep Cycle Battery
- o 5V USB output for phone/laptop charger

We deliver a radio service to customers to allow them to connect to the internet from anywhere in the UK.

Monthly packages start from £32 for 18GB of fast internet with add-ons from £1.50 per GB. See our website for other packages available.
